

High Performance

The tensile strength of High Performance Bead Cord on cards is very high even in small diameters. It cannot be broken by hand. These fibres are 15 times stronger than steel, making them the strongest fibres in the world. High Performance is only available in white in ten different thread sizes and two packs.

Unique benefits of High Performance on card:

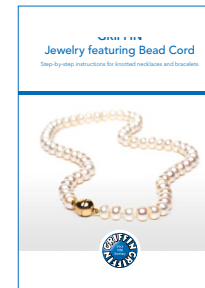

- The special stringing needle attached makes stringing beads on quick and easy
- No additional needle necessary
- No need to double thread when stringing on and tying beads
- Outstanding tying properties
- Twisted three times to avoid fraying
- No tangling, no knotting
- Extremely strong, soft and smooth
- With silky sheen
- Ideal for heavy beads – does not become deformed
- Total security for your jewelry

Materials for the pearl necklace

- Cultured button pearls, light cream, Ø 8.0 mm
- High Performance No. 3
- Magnetic Ball Clasp, gold plated, Ø 8.0 mm
- Bouillon, gold plated

Recommended tools

1 pair of
Knotting
Tweezers

1 pair of
Stringing
Tweezers

1 pair of
Scissors

1 tube of
Bead Cord
Glue

Step-by-step guide . Pearl necklace

1) Tie a knot at the end of the thread to secure the pearls. String on three pearls and 1.0 cm Bouillon and push to the end of the thread. Guide the needle through the eyelet on the clasp and the first pearl, tighten and knot the two threads together.

2) Guide the needle through the second pearl, tighten and knot the two threads together. Do the same with the third pearl (see images 2 and 3).

3) Disregard the shorter thread. String on the rest of the pearls and tie a knot close to each pearl after stringing with Knotting Tweezers.

4) String on the last three pearls without knotting them in place. Guide the thread through a 1.0 cm piece of Bouillon, through the eyelet on the clasp and back through the first pearl.

5) Now push the pearls tightly together. Guide the thread through the first pearl and knot. Do the same with the next two pearls. Secure the knots with Bead Cord Glue and cut the thread.
